

Company Profile

Conception & **Formation**

From a humble beginning with Greige Fabrics, the company ventured into finished fabrics for shirting. By the 90's the company was already manufacturing 2.5Lacs meters of various kinds of shirting fabrics. By now they had appointed dealers in all major states in the country!

The business grew by leaps and bounds over the decade and by the year 2000, the company was manufacturing 6Lacs meters of fabric per month and had appointed 50 dealers all over India!

The company then ventured into the international markets such as UAE, FAR EAST, AFRICA and SOUTH AMERICA.

Conception & **Formation**

The quest for excellence paved the way for setting up one of the first Auto Loom projects in Bhiwandi, located 50 Kms away from Mumbai city. This project was planned with SULZERS, SOMET EXCEL, SOMET THEMA and RAPIER LOOMS with an initial capacity of about half a million meters per month of shirting fabrics manufacturing primarily Poly Cotton Blends.

As business grew, the company entered the 100% Cotton shirting fabrics market and put up the very first KARL MAYER sizing, the one of its kind in the entire Bhiwandi area.

It could now manufacture Fine Count Yarn Dyed Cotton Shirting fabrics for both the overseas as well as the domestic markets.

The next step was to augment the manufacturing capacity further.

This resulted in the installation of state of the art high speed weaving unit comprising of the latest PICANOL SUMMON AIRJET LOOMS.

We are proud to say that these are one of a kind which are available in any manufacturing unit in Bhiwandi .

From humble beginnings, the business slowly and steadily grew leaps and bounds and by the year 2010, TOPMAN had established itself as one of the leading shirting manufacturers in its business, in both international and domestic markets.

Conception & **Formation**

Slowly the company targeted garment exporters, different garment brands and captured the market in this segment too. With their zeal to excel and always be at the forefront of their trade, they forayed into Jacquard Shirting Fabrics and Furnishing Fabrics and put up the SOMET SUPER EXCEL and SOMET ALFA JAQUARD LOOMS. Thus, the capacity of the unit increased to producing 1.5 Million meters per month.

The company then entered the Women's wear markets. It started manufacturing fabrics like RAYONS, MODAL, TENCEL and various blends apart from the shirting fabrics.

It also started manufacturing materials like Viscose, 100% Linen, Indigos and Cotton Linens and Lycra Blends to add to their portfolio.

Value Addition was being offered with fabric finishes like carbon peach, wicking , ETI , flannels and water repellency.

Although the finishing or fabric dyeing part was being outsourced, the quality was never compromised upon and was being done in some of the best and finest dyeing units in and around MUMBAI.

Prints were distinctly missing from the vast portfolio and that too was eventually added. Today the company boasts of selling almost 4 Lac plus meters of prints in Various fabrics such as 30s Twill, 40s Poplin, 40s Stretch Poplin, 60s Poplin and 60s Satin.

Conception & Formation

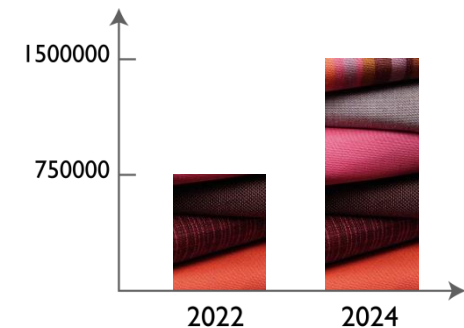

Further the management decided to venture into an uncharted territory of hand embroidered Haute Couture Fabrics used for weddings and other party wear in the name of TULIP EXIM. It also manufactured Hand embroidered accessories which were primarily for the export market.

Through a lot of perseverance and hard work, TULIP EXIM was able to establish this sister company as a name to reckon within a couple of years of beginning. They now cater to customers based in EUROPE , FAREAST ASIA, USA, AUSTRALIA, MALAYSIA, MOROCCO, INDONESIA and SOUTH AMERICA.

As part of its initiative to keep itself well versed with the current market trends in the international market it has been participating in some of the biggest textile fairs like TEXWORLD, PREMIER VISION, MAGIC LAS VEGAS and many more exhibitions organized by the SRTEPEC and various other EXPORT PROMOTION COUNCILS over the years.

The latest venture of the company was to start its garment manufacturing unit and in just a span of less than a year we are catering and supplying ready FOB shirts to brands like LAWMAN, SIYARAM, MAX, GINI & JONY MYNTRA, First Cry, Integrity to name a few.

With the grace of God and support of our well-wishers, we further shall strive to offer the very best to our industry!!

We have reached a target of almost 50000 shirts per month and are looking forward to taking the same to around 150000 garments per month in the year 2024.

Modernization & **Expansion**

All our manufacturing plants & processing house have been set up with state of the art machinery to meet international product standards. We have warping equipment from India and Belgium and weaving machines from Italy, Switzerland, Belgium and Germany.

Our latest manufacturing facilities comprise of Rapier, Sulzer, Donear and Picanol looms. We have recently added Jacquard weaving machines, Karl Mayer sizing and high-speed Airjet weaving machines to our manufacturing units. With world-class manufacturing technology, TOPMAN manufactures high quality elegant shirting and suiting in various blends, widths and weaves.

We at TOPMAN believe in emphasizing on product innovation and development.

Design & Development

The importance of having an inhouse designing setup was realised a long time ago resulting in the development of a designing studio as on date equipped with 4 different designing softwares which include woven , jacquard and print design development. Having a strength of 8 cad designers for woven fabrics and 2 designers for printing and jacquard designing. We are also equipped with the entire range of pantone colors to facilitate our customers.

Further to assist us in development we have 8 handloom machines with a capacity to make about 300 plus handlooms per month. A Suzuki sample warper which helps us to cater to the requirement of most of our branded customers in producing sampling lengths as per their requirement of about 25 to 30 meters along with a single end sizing machine with 18 spindles to make smaller beams for the sampling. At the same time we have dedicated 2 normal working looms exclusively for developing new fabric qualities and sampling all the time.

- 24 single width alpha rapier looms
- All looms equipped with staubli dobby
- Monthly production capacity 2.50 lacs mts

Product

- Shirting fabric used in apparel
- Fabric used for upholstery
- Ready made curtains

Finishing & Processing

We do a variety of finishes such as Soft Mercerised, Easy to Iron, Brushing, Carbon Peach, Wrinkle Free, Water Resistant, Paper like Stiff, Chintz etc.

Owing to its vast product portfolio comprising of many blends and qualities, the company decided to outsource the processing and finishing of fabrics rather than setting up an in-house unit which would have limited the scope of products on offer.

TOPMAN has entered into long term contract agreement with a select few process houses here in Mumbai and Ahmedabad to ensure timely and regular delivery of goods.

The process houses have been specifically chosen based on their field of expertise.

This ensures that there is no compromise on the fabric finish required by the buyer.

This arrangement has proved to be very beneficial for us as we can concentrate on what we do best, that is on product development.

Hand Embroidery & **Accessories**

TULIP EXIM is the sister concern of TOPMAN which deals exclusively in Hand Embroidery and high value fabrics.

Embroideries have been our client's muse.

Detailing of every material sourced and created is indispensable.

Every design presented to the clients is designed using trends, forecasts and most importantly, inputs of the clientele. Often, our special collections are based on the client's inputs.

At TULIP EXIM, we ensure that highest levels of international standards are followed. We ensure on time deliveries and make sure that our clients are satisfied with our innovative designs and patterns.

We work with designer boutiques and high value fashion brands across the globe. Some of our clients are BERTA, DISNEY, JOEL AND SONS to name a few.

Please visit our website **www.tulipexim.com** for more information on our hand embroidered products.

Journey So Far

We at TOPMAN regard every milestone achieved as a stepping stone to the zenith. We aspire to benchmark our achievements against international quality standards.

With ambitious plans for its growth, TOPMAN continues to exceed the expectations of its clients. With our focus on manufacturing products of excellent and consistent quality; adding value by offering a variety of weaves, designs, and finishes; innovating continuously to create new products; and satisfying our customers with our excellent service and timely delivery.

We at TOPMAN are on our path to becoming a complete Fashion Apparel Company.

Aspiration & **Vision**

TOPMAN believes in sustained growth to fulfil the aspirations of its customers and employees. We stand by the fundamentals of enhancing lifestyle across all demographics and diversities by supplying to the best fashion brands in India and across the globe.

We take it as a responsibility to put in every possible effort for the development of our people. Ever since the beginning of our operations, we have made sure that every step is taken for the improvement of our society and surroundings. As a part of strong vision for our company, we make sure our contributions go for sustainable development and towards a better world.

Our vision is to become a world-renowned supplier of superior quality textiles by providing a highly satisfying customer experience through product innovation, on-time delivery and superior service standards, thereby establishing TOPMAN as a synonym for quality.
